

January 1, 2013

Dear Parents,

As part of our class study of _____, your child will be making a presentation about what he or she has learned. Some may wish to use Internet tools, such as Animoto which allow students to create dynamic presentations online using content they create in class. Students who wish to use these tools will need an email to create an account. Animoto requires that users under the age of 13 have permission from a parent or guardian to use the service.

This project does **not** require the use of these tools as we have other software that will work well, but students do find web tools engaging, and they can log on from any Internet-connected device to work on their projects.

If, after carefully reviewing the user agreements below, you would grant permission for your child to use Animoto for his or her presentation, please complete the form below and return to school by _____.

Please feel free to contact me at _____ if you any questions about this technology project.

Animoto user agreement <http://animoto.com/legal/terms>

Sincerely,

_____ I give permission for my child, _____ (name), to use Prezi or Animoto for this technology project.
